

# FAUSTINA E AURELIO

THE ONLY SYSTEM OF HEATED CHAIRS AND TABLES  
FOR YOUR EVENINGS OUTDOORS

*Once upon a time, in Regium Lepidi, there was a great warlord named Aurelio Commodo and his young wife Faustina, which, united in a pure amplexus, gave warmth to wayfarers looking for relief...*

# FAUSTINA E AURELIO

## THE ONLY SYSTEM OF HEATED CHAIRS AND TABLES FOR YOUR EVENINGS OUTDOORS

Design tables and chairs for dehors, light and durable, thermally insulate and equipped with a coating easily **cleanable and sanitized**.

They are equipped with an **integrated heating system**, autonomous and independent for each seat, in order to avoid the subcooling of dishes and to ensure the right warm for people seated.

The system can be powered by 230V electric grid with a built-in extra-low voltage (24Vdc) power supply. As an alternative (optional), it can be powered by **rechargeable lithium battery**, which provides an autonomy of 3/6 hours (depending on use configuration).

All the heating system is run by a dedicated App, usable with tablet, smartphone or PC, in **Wi-Fi mode**.

### FAUSTINA

#### Material

EPS Den30AE laminated with polyurethane resins

#### Power supply

230Vac/24Vdc

#### Maximum power

432 W

#### Battery life

Maximum power 3 hours

Minimum power 6 hours

#### Size and Weight

Faustina mm 425x485x800h 3 kg

Aurelio mm 1200x1200x740h 8,5 kg

### AURELIO

LIMITED EDITION

Limited edition production of exclusive design pieces for "Fuori Salone 2021".

Project protected by patent nr. 102021000010124, presented to M.I.S.E. submitted on 2021.04.21, tested against electromagnetic fields emissions and against polluting substances. **CE certificate**.

**AMPLESSO** It is a project by **COMMODO SRL.COM**

**Amplesso** s. m. [dal lat. amplexus -us, der. di amplecti «abbracciare»] - letterale: Abbraccio  
**raddoppiò** n.m. [from the Latin amplexus - us, der. of amplecti «embrace»] - literal: Embrace

## HOW TO USE THE SYSTEM

The management of the heating system takes place through portable hardware (tablet or similar) and by management software (owner) in **Wi-Fi mode**.

The table and the chairs can be set independently on **4 different temperature levels**: Cortina, Portofino, Amalfi and Taormina, depending on costumers needs.

Once you have logged into the control panel it is possible to name the tables (for example in relation to their position) and manage them from the graphical screen (intuitive) dedicated to the **single table**, or eventually for **groups of tables** or even **all together** (for example opening and closing of the diner).

Login screen to temperature management system (login)

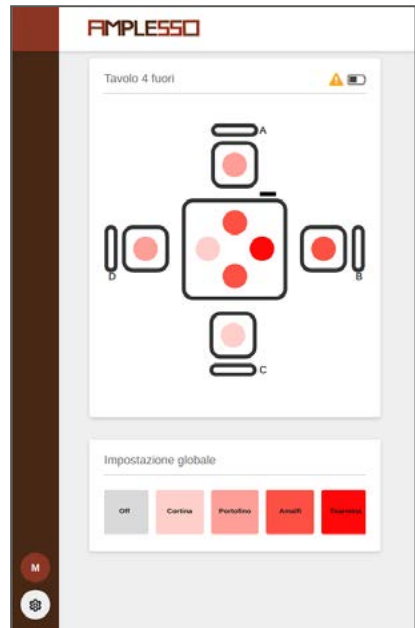

Management screen of one unit:  
1 table and 4 chairs

Management screen of multiple units or eventually of the whole place.

Management screen of multiple units:  
1 table and 4 chairs (on smartphone)
